EDUCATION

FAST NUCES

Bachelor of Software Engineering

Islamabad, PK

Aug 2022 – June 2026 (Expected)

PROFESSIONAL EXPERIENCE

AIMS LAB

Stock/Crypto Forecasting System | NLP & Machine Learning

Islamabad, PK

Sep 2025 – Present

- Built a Python-based forecasting system using OHLCV market data and financial news sentiment.
- Implemented and compared ARIMA, Moving Averages, LSTM/GRU models for price prediction.
- Visualized historical and predicted prices using interactive candlestick charts with error tracking.

Dutch Based Painting Company

Full Stack Developer

Remote/Islamabad

June 2025 – Aug 2025

- Developed a painting company's CRM system to validate customer management, job scheduling workflows, and overall platform reliability.
- Built and integrated an interactive employee dashboard to display job cards with detailed client information, enabling real-time tracking of work status and location on a map.

PROJECTS

Tahqiiq – AI Legal Document Analyzer | FYP

- Developed an AI-powered legal document analyzer for contract review, clause extraction, clause classification, summarization, risk detection, and document-based Q&A.
- Implemented NLP/LLM modules to classify clauses into legal categories such as confidentiality, liability, termination, payment terms, and obligations with confidence-based results.
- Built a RAG-based chatbot to answer lawyer/user queries from uploaded legal documents with cite-grounded, context-aware responses and reduced hallucination.
- Added core features including secure PDF upload, clause search/filtering, risk scoring, ambiguity highlighting, document-level summaries, report generation, and export of analyzed data.
- **Tech Stack:** Python, NLP, LLMs, RAG, LegalBERT, FastAPI/Backend APIs, MongoDB, Vector Database/FAISS, React

ERP Software for Hospital | Full-Stack Development

- Developed a full-stack hospital solution combining ERP modules and a Donation Management System to ensure accurate workflows and reliable data handling.
- Implemented an admin dashboard to manage donations, doctors, staff records, appointments, and website content with real-time tracking and reporting features.

TECHNICAL SKILLS

- **Programming Languages:** C++, JavaScript, SQL, Python
- **Technical Skills:** MERN, Python Backend Frameworks (FastAPI), Docker, GitHub

LEADERSHIP & ACTIVITIES

- **Nascon 2025:** Led the National Level Web Dev Marathon and engineered a full-stack MERN registration website, replacing manual WhatsApp forms with a centralized online platform. Implemented secure user authentication, dynamic event registration workflows, and an administrative dashboard to streamline attendee onboarding.
